Re: CC: Commercial Attaché – Ukrainian Embassy - Jordan

Reason: Seeking business cooperation with Ukrainian companies

Priority: Urgent

### Comments:

Dear Sir ,

Al-Muhtadi International Trading Est. is globally recognized company in number of sectors, some of which but not limited to the supply of Bio-deasil materials and products.

With this we kindly ask you to direct us to manufacturers of crude Rapeseed oil that supply the specified material and have the capacity to supply the quantity .

We thank you very much in advance for your kind swift reply and look forward to further cooperation with your beloved country.

Thank you

Dr. Majdi Muhtadi  
Chairmen

## “ Company Introduction ”

Al-Muhtadi International Trading Co. LTD.Technology Consulting (P) Limited was established in the year 1990 with a vision to start production of Centrox™ and subsequently proceed with production of Concrete Products (Blocks, Slabs, Bricks, etc) either as a separate unit or as an extension of Al-Muhtadi International Trading Est. Technology Consulting (P) Limited. The state-of-art ultra modern plant will be located near to major ports in India and will commence production of Centrox™ under Phase 1 by end May 2006 under license from Evenrange Australia Pty Limited. Al-Muhtadi International Trading Co. LTD.Technology Consulting (P) Limited vision is to create trade exchange between South Asia, India Subcontinent, Middle East, Africa and Europe, which are the world's most developing populations, concentrating mainly in the following areas:

- ❖ Special Government Projects
- ❖ United Nations approved Mobile Water Units
- ❖ United Nations Low Cost Housing Projects
- ❖ New Water Purification Systems for Arsenic Removal
- ❖ New Biotech Sewage System
- ❖ Technology Transfer
- ❖ New Innovative Technologies

Al-Muhtadi International Trading Co. LTD.Technology Consulting (P) Limited is a diversified company having interest in commercial enterprises, local and international trade and the promotion of non profit social programs. This is achieved in conjunction with our main principals, partners and associate companies based in Africa, Australia, Common Independent States (Russia), Poland, Portugal, Saudi Arabia, South America, Spain, Turkey, United Kingdom, United Arab Emirates and United States of America. A part of the group energies are directed towards implementing social programs, aids and environmental projects worldwide. The varied broad spectrum of services and manufacturing activities are solidly backed by Al-Muhtadi International Trading Co. LTD.Technology Consulting (P) Limited principals and associate group companies who are run by team of professional and experienced people.

## Company Activities

“

## **STANIMEX GROUP PTY LIMITED**

“

Established in the year 1990, acting as agents and distributors for Mobile Water Units and Water Purification System including for removal of Arsenic. These products are approved by the United Nations. Same will soon be introduced in India as we and the United Nations envisages an excellent scope for these products in South Asia, India, Subcontinent, Middle East and Africa. They are also into introducing newer innovative technologies for cost effective commercial production for the benefit of humankind.

“

Complete Purification Plant for Portable Water

“

STANASH GROUP (P) LIMITED

“

Holders of the global manufacturing License for Concrete Additives Even Crete® and Curing Compounds Even cure®. Production in South Asia is expected to start in 2007 in the state-of-art ultra modern plant in India and Maldives. Plans are in the pipeline to open a second unit in Canary Islands, Spain by mid 2007. Established in the year 2001 as a Joint Venture partnership company between Stanimex Group Pty Limited and Al-Muhtadi International Trading Co. LTD. Technology Consulting (P) Limited to manufacture and promote new Concrete technologies worldwide. This Joint Venture Company finds its greatest strengths in its expertise in Market Development, Project & Financial Management with strong Business ethics. This Group was able to establish a highly qualified Team of Associates and partners, such as Even range Australia Pty Limited, with experience in Project Development, Production and Research especially in the area of new Technologies. The activities of this joint venture Company have diversified and centered on both non-profit and commercial endeavors. A great part of the Group's energy is directed towards implementing social low cost housing programs, environmental projects and facilitating Aid Funded Projects.

## **THE OBLOCK TECNOCRETE INDUSTRIES**

OBLOCK also known as foamed concrete or cellular concrete is not an autoclaved aerated concrete (AAC) product, it is conventional concrete with a wide range of densities, choice of aggregates and mix designs. OBLOCK Lightweight Concrete Panels the multitude of applications for OBLOCK lightweight concrete include: aerated lightweight concrete blocks and lightweight tilt-up panels, foamed concrete floor screeds, sound and thermal insulation, geotechnical and ornamental concrete applications. Our Aerated Lightweight Concrete lends itself to tilt-up construction methods, and panels can be poured even on site, saving transportation and handling costs. Casting of our lightweight concrete panels is very similar to producing regular panels and most commercially available additives used with concrete can be used with our aerated lightweight concrete too. Aerated Concrete Masonry Blocks amongst a range of lightweight masonry blocks which can be produced from OBLOCK foamed concrete, our OBLOCK -patented worldwide -is probably the most interesting product. OBLOCK is a mortar less, interlocking lightweight block which saves on construction time, which can be produced in various densities. It features high insulation values, is fireproof and can be made in several sizes, although certain symmetric need to be taken into account. We can supply moulds and machinery needed for the production of these lightweight aerated concrete blocks and are looking for Licensees around the globe. Production in Maldives is expected to start by February 2007 (first phase) in the state-effort ultra modern plant and then (second phase) in Iran, Lebanon and in Canary Islands, Spain by mid 2007 Aerated Concrete Masonry Blocks OBLOCK Lightweight Concrete Panels Insulated Blocks & Panels used for building a 50m2 House in 1 Day

# Grope of Companies.

## “ EVENRANGE AUSTRALIA PTY LIMITED

“ Manufacturers of Cement/Concrete Additives under the brand name of Even cure® and Even Crete®. They are our principals under whose license, production will be done in India under the brand name of Even Crete®. Even range Australia Pty Limited has been successfully manufacturing specialized Products

“ including concrete curing compounds and coatings for civil and commercial construction industry for more than 10 years. It was the FIRST Company in Australia to introduce Hydrocarbon Resin curing compounds to major civil projects. During the past 07 years Even range Australia Pty Limited have strived to formulate products that are safe to use, environmentally friendly and yet still perform above the requirements set out by Standards and its customers.

“ Some of these products currently being used today include XDS, Even cure BCP, Even cure AC and Even seal NS1. These Products still have no equivalents available in the Industry. Entire range will be produced in Canary Islands for European, Middle Eastern and African markets and in India for the Asian and Middle East markets. Over the past 04 years Evenrange Australia Pty Limited has undertaken an extensive research program to develop and manufacture unique concrete enhancement and repair materials. This was as a result of a comprehensive market Investigation, Research and Development, lengthy testing and Trials. The requirement was to find and develop products that were:

“ Environmentally and User Friendly, Exhibit High performance in harsh working environments and above all  
“ be 100% compatible with Concrete.

## ■ Al-Muhtadi International Trading Co. LTD.SINO PETRO-COM (ASIA) LIMITED

Established in the year 2004 with a vision to handle all the trading business of the parent Company ALMUHTADI INTERNATIONAL TRADING EST. TECHNOLOGY CONSULTING (P) LIMITED who together with their principals, partners and associate companies are in the following areas of business, joint ventures, consultancy services, technical exchanges, distribution, testing, transportation, designing and barter trade. \Trading mainly in Rice, Sugar, Edible Oils, Cement, Construction Material, Bio Agricultural Fertilizers, Urea Fertilizer, Organic and Non organic Fertilizers and Chemicals, Nitrogenous Fertilizer, Phosphorous Fertilizer, Potash Fertilizer, Composite Fertilizer, Scrap Metals (HMS 1&2, Used Rails, Iron Ore Fines and Copper Wire, Copper Cathodes), Petroleum products (Heavy Fuel Oil, Gasoil D-2, Mazut M-100, Liquid Petroleum Gas (LPG), Liquid Natural Gas (LNG), Jet Fuel (JP1A), etc... we have flexible ways for business. We will spare no effort on developing a comprehensive business by combining import and export, technology and trade, Industry and trade and agriculture and trade. Thus, within a short span of time, the company has proved its capabilities in meeting continuous demand of different products required by various companies. The Company sincerely hopes to join hands with new and old friends for future development. We are a growing company with a successful track record over the past three years and we owe this to our satisfied clients all over the world. The company has developed an excellent rapport with its Business Associates established in different countries. The company is ready to provide services in line with the client's requirement such as, in providing representation and marketing services for companies interested to get into the Indian Market. The company holds a team of professionals to analyze and research markets for your products. We are very much interested in tapping the WORLD MARKET and therefore are very keen to have an association with Prospective Manufacturers & Buyers so as to interact with them for preliminary negotiations in order to establish a long and synergetic business relationship. Our ability to work in close co-operation with all our associates will help them in becoming market leaders in their respective businesses. Our business objective is to provide our business associates with the best quality products at the lowest possible prices. This is critical for manufacturing companies to gain competitive edges in today's globalizing market.

# GROUP OF COMPANIES CONTINUE.

## SINORICH GROUP INCORPORATED SHANTHANEER Al-Muhtadi International Trading Co. LTD.(PRIVATE) LIMITED

Both as subsidiary companies of Al-Muhtadi International Trading Co. LTD. Technology Consulting (P) Limited, we act as agents for many investment banks, brokers, underwriters and financial advisers, as well as businesses ranging from the largest public companies and multi-nationals, to family owned businesses across a broad range of sectors but particularly technology, communications, media, retail, leisure, natural resources and construction. We also act as lead advisors on project finance transactions, advising developers on structuring, negotiating terms, preparing bids and raising finance for infrastructure projects.

We also advise government and other project sponsors on attracting developers and finance for infrastructure projects. Our involvement in these industries gives us not only truly specialist knowledge but also in-depth market intelligence. This enables us to enhance significantly the value of advice given to our clients in these areas – whether institutional or corporate. We handle all the trade financing deals for Al-Muhtadi International Trading Co. LTD. Sino Petro-Com (Asia) Limited and funding projects for Al-Muhtadi International Trading Co. LTD. Technology Consulting (P) Limited.

## EMPOTEX SA

Empotex SA is a trading company that gives assistance to match buyers with sellers worldwide. The mission is to foster and take part in worldwide business operations, for the common advantage of all

related parties, by catering competitive and quality products, whilst offering full integrity and dependability. Our company's primary role is that of a consultant/broker to bring together international buyers and manufacturers. Buyers get in touch with us seeking goods with the best quality/price ratio. Sellers reach us so we can provide buyers and facilitate their export transactions. We are working with the largest and most trustworthy commodity suppliers around the world, enabling us to offer to our customers the most competitive prices. We can basically procure any product. Joint Venture Partners

## CELLULAR CONCRETE LLC

Cellular Concrete LLC is a world leader in the manufacture and supply of engineered foam liquid concentrates for all types of Geotechnical, construction and insulating applications. Mearlcrete® and Geofoam™ provide a lightweight durable concrete product with built in integrity. Cellular Concrete LLC cellular concretes are lightweight concretes with a Portland cement base containing many small air cells uniformly distributed throughout the concrete. Simple and precise control of the volume of these air cells, produced mechanically by means of special foaming agents, results in CONTROLLED DENSITY over a broad range from 20 to 120 pounds per cubic foot (320 to 1920 kg per cubic meter).

## PHOENIX SDS COMPANY LIMITED

Making construction one step easier and Houses more comfortable to live in K Block CLC Foam Concrete Technology has been used around the world to produce lightweight precast walls and panels for over 50 years. In the past, Phoenix DS had focused on using this technology to produce only lightweight blocks. But about one year ago Phoenix SDS began using K Block CLC Foam Concrete Technology to bring new benefits to precast walls. By using K Block CLC Foam Concrete Technology to lower the weight of a precast wall, contractors are finding that the installed cost of the lower weight wall is comparable to a brick wall that the site needed less workers and that units are built faster. In all, projects are completed quicker, easier, and at a similar cost to if the project had used bricks.

# GROPE OF COMPANIES.

## PROJMORS LIMITED

Projmors Limited is the registered official expert company for the Ministry of Building, Ministry of Environment Protection, Ministry of Natural Resources and Forestry and Ministry of Transport and Maritime Economy in Poland.
