10.05.2017<sup>20</sup> nr. 128

Dear Sir/Madam,

On behalf of the Ministry of Economy of the Republic of Moldova, I am pleased to invite you to participate at the "Moldova Automotive Days 2017", an automotive components and suppliers event, held in Chisinau, Republic of Moldova on 13-14 of June, 2017.

"Moldova Automotive Days 2017" will host all automotive companies present in Moldova both local and foreign, sectoral associations, development organizations and partners, public authorities and representatives of diplomatic missions accredited in Moldova.

With some significant investors already producing and outsourcing to the country, there is a large range of opportunities for companies which are seeking new production opportunities and investments. Dräxmaier AG, Lear Corporation, Confezione Andrea, Gebauer&Griller, Steinel Electronic, Fujikura Automotive and others already established their own plants in Moldova, or source from Moldova by making use of the local sub-contractors.

Moldova's modern automotive industry foundations build on its strong industrial past. Whether you are looking to gain access to the CIS or European markets, optimize your operational costs, find skilled labor at competitive wages, relocate and still remain close to your distribution or assembly centers, Moldova is the country that meets your needs.

Two working days will be dedicated to discuss regional trends in the automotive industry, Moldova's business climate and opportunities, study visits and meeting potential partners.

The event is organized by the Moldova Investment and Export Promotion Organisation (MIEPO) in partnership with the German Cooperation Agency (GIZ) and the European Business Association Moldova (EBA Moldova).

For confirmation and any further information regarding the event, please don't hesitate to contact MIEPO – [automotive.moldova@miepo.md](mailto:automotive.moldova@miepo.md) or register on-line at [www.automotivemoldova.com](http://www.automotivemoldova.com).

I am confident the planned event will allow you to identify new areas of cooperation.

Sincerely,

Octavian CALMÎC,  
Deputy Prime Minister,  
Minister of Economy
