We are looking for the partnership for manufacture and implementation of joint projects into industrial equipment. Let us introduce our factory and show to our proposition.

Makfen is factory which manufactures and montages of the high quality made process equipment for the food, pharmaceutical, petrochemical and chemical industries.

Today, Makfen continues to provide the best service to their customers with professional, wide engineering staff and 40 employees.

Our production areas are 2000 square meters - open area, 2000 square meter for stainless steel manufacture, 2000 square meter for carbon steel manufacture area.

We are specialized on process equipment such as:

1. Pressure vessels,
2. Agitator tanks,
3. Storage tanks,
4. Silos,
5. Reactors,
6. Boilers,
7. Heat exchangers,
8. Blenders and mixers,
9. Condensers,
10. Filters,
11. Separator.

We achieved good position on our market not by company size, but through the efforts of highly motivated employees who always focus on the customer's needs in their work. We react quickly to your individual needs.

Makfen takes on any project: small or large, simple or complex, and gives you a technical support and responsive assistance at all phases of a project realization from construction design to delivery stages.

Our range is available in various configurations, sizes, and specifications as per the client's requirements.

We think that our cooperation would have a very good market potential and our production can well compliment your economic activities for better market penetration, to improve total customer satisfaction.

It is not a secret that total production and business costs can be lower with cooperation with Turkey.
