

ABOUT COMPANY

Talasco Dagang Sdn. Bhd. (TDSB) began operations in November 1984 and is 100% wholly owned and managed by Bumiputeras. Under the stewardship of the very able and pro-environment of Raja Datuk Nong Chik family, one of Talasco Dagang's main businesses since its inception is metal recycling business. We procure these metal recyclable materials from companies in the private sector and Government agencies such as Tenaga Nasional Berhad, Telekom (M) Berhad and the Ministry of Internal Affairs (Kementerian Dalam Negeri) and sell them to the end-users. In 1997, we started our Services Division when we tendered for Left Luggage Service in KLIA. We were then awarded with the contract and thereafter appointed by Malaysia Airports Berhad to manage the Left Luggage Services in Kuala Lumpur International Airport (KLIA). In 2000, TDSB extended its services by providing Locker Services at the Satellite Building. In 2005 when LCCT-KLIA was officially opened, we were appointed the sole operator for Left Luggage, Unaccompanied Baggage and Courier Service operator for LCCT. Currently, the TDSB is proud to be the sole operator of the Left Luggage Services in both main airports in Malaysia.

Today, Talasco Dagang is living up to its name which is the abbreviation of "Tahan Lasak Company". ("Tahan lasak" is the Malay equivalent of durable). Talasco Dagang's durability has gone from strength to strength and we have diversified into other services. Harnessing our top team's 20 years of experience in the marine industry, our vision and innovative team successfully designed our very own speedboat with its one-of-a-kind hull and tunnel design, making our boat like no other. Our Engineering Division currently manufactures and supplies our very own speedboats, CAPTOR.

From our humble beginning of just one division specialising in the metal recycling business, TDSB has weathered its fair share of economic crisis. Our company has evolved and diversified into 7 divisions. Streamlined to serve our business partners and clients better.

COMPANY GOAL, VISION & MISSION

Talasco Dagang is dedicated in delivering innovation and technology to the service industry. Our goal is to build a bridge between our clients and us through innovative business solutions. We believe that effective communication between our clients and us is the key to the future of the service industry. To implement this vision, Talasco Dagang will expand its research and development network that extends throughout the region

OUR PHILOSOPHY

Talasco Dagang is in a professional services business. As such, our employees are our greatest asset since they are our product. We strive to be an employer of choice so that we can attract and retain the best and brightest professionals in the industries we support. In doing so, we have created an environment and culture where our employees can succeed. Our employees advance based upon merit, receive rewards based upon their contributions and performance, and get the support they need from management and our corporate administrative staff.

We're about people who don't just go to work, but love their work. We're about people who don't just do a job, but live their role as an expression of who they are. We're about people who are not just productive, but who achieve extraordinary results daily.

VISION

“To be the preferred partner for leading service providers, governments and enterprises in by helping them create, build and maintain the most innovative, reliable business service provider”.

MISSION STATEMENT

- *To attain the best value for the stakeholders*
- *To develop a superior solution for our users through state-of-the-art technology, innovation, leadership and partnerships*
- *To deliver the best possible business service solutions to help our clients improve business profitability*

SUMMARY CORE VALUES

- *Innovation - Always raising the bar.*
- *Service Excellence - Giving the best and world class service and achieving excellence each passing day.*
- *Honesty & integrity - Saying what you mean. Doing what you say you will do.*
- *Affinity - Engaging with our clients and our people with a comprehensive understanding of their needs*
- *Respect - Allowing our stakeholders to be themselves and appreciating individual difference.*
- *Passion - Making a difference in all that we do.*

COOKING OIL

vegetable oil

Our mission to provide good quality Cooking oil for Malaysia and Export market, The palm oil is rich in natural chemical compounds important for health and nutrition. Among others, it is a natural source of Carotenoids & Vitamin E as well as supplying fatty acids and other important fat-soluble micronutrients. It also supplies an abundance of calories that gives us much-needed energy for our daily life. Palm oil is derived from the flesh of the fruit of the oil palm species E. Guineens is. In its virgin form, the oil is bright orange-red due to the high content of carotene. Palm oil is Nature's Gift to Malaysia, and Malaysia's to the World.

Talasco Dagang Sdn Bhd has been in the trading and service market for over 35 years in Malaysia. Talasco Dagang is the holding company that manufactures Chef Rose Refined Cooking Oil. Chef Rose Refined Cooking Oil is manufactured through the highest standards. We believe in delivering quality and value for money products to our consumers. Made from 100% premium pure palm oil, it is rich in Vitamin E, trans fat free, cholesterol & lactose free and there is no additional additives or preservatives.

RECYCLE - SCRAP METAL

talasco scrap metal

Every year, tonnes of metal of all types are being used, recovered and recycled. Recognising that non-ferrous metals are an essential component in everyone's daily lives, there is need to ensure that the benefits generated today by the activities of the non-ferrous metal sector are secured for the future generations. However, at the same time, the environmental and social implications of such activities should not be ignored and decisions with regards to the use, recovery and recycling of these precious metals should integrate with considerations for the economy, social and environment.

Here at TDSB, we believe that we can operate a business that not only generates revenue but could also help preserve our environment and its precious minerals. In fact, one of our main businesses back in the 1990's was recycling metals such as aluminium and copper. Leveraging on our company's excellent business relationship and contacts, TDSB managed to secure the license to procure recyclable metals from Government agencies such as Tenaga Nasional Berhad, Telekom (M) Berhad and the Ministry of Internal Affairs (Kementerian Dalam Negeri) and other private firms. These recyclable non-ferrous metals are then sold to end-users for further processing.

Our Recycling Division strives to ensure that our metal recycling business is well-structured and regulated. We endeavour to break away and change the public's common perception that metal recycling is more than just scavenging for recyclable metal wastes. We would like to help educate the public that it is a green business with great potentials. As a responsible corporate citizen, TDSB is committed to efforts to preserve the environment and Mother Nature's natural resources while generating revenue for our group of companies.
